

Master Lock has been supplying padlocks to U.S. military for many years-

Here is an unsolicited testimonial from a happy Master Lock GI customer!

Just wanted you to know that while operating in a convoy in downtown Baghdad my vehicle was hit by an improvised explosive device blowing out my two rear tires. I pulled up to the next vehicle, jumped out to hook up our tow chain, and realized that our chain only had one hook. I should have known this, but in order to get myself and my soldiers out of the "kill zone" while being fired upon by insurgents I used a Master Lock to secure my chain to the vehicle ahead of us. Your lock was so tough that it pulled a broken uparmored M1114 military vehicle 4 miles to the nearest base for repair. Thank you for manufacturing such a quality product.

Lance - US Army, AA
