

The Bump Stops Here!

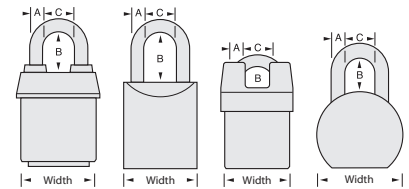

Lock Bumping – Lock Bumping has become a legitimate security threat as information on the topic has become widely exposed in the news media and on the Internet.

In response to this threat, Master Lock Company developed our exclusive patent-pending BumpStop® Advanced Technology that prevents the transfer of force from the bump key to the pins and blocks rotation of the cylinder. With a reverse rake tapered driver pin, high performance spring and precision tolerance chamber, BumpStop® exceeds ASTM F883-US Grade 6 test criteria. For more details, including video of BumpStop® technology in action, see www.bumpstopsecurity.com.

- Hardened boron alloy shackles for superior cut resistance
- Dual ball bearing locking mechanism resists pulling and prying
- High security cylinder
 - 5-pin and 6-pin cylinder provides tens of thousands of key changes
 - Spool pins are virtually impossible to pick
