

Lock-Locker Compatibility Program™

Have Confidence in Your Lock and Locker Selections!

This Seal Signifies WEC Mfg.'s Participation in the Lock-Locker Compatibility Program.™

We are dedicated to providing you with a problem free solution.

Compatibility and Quality Program

Master Lock Company and WEC Manufacturing

Committing to lock and locker compatibility and quality

We understand that the compatibility between lock and locker must be seamless. We have your solution – the Lock-Locker Compatibility Program.™

Master Lock, in partnership with WEC Mfg., has developed an ongoing engineering collaborative and testing program. The program is designed to help ensure the locker purchaser receives a high quality, seamless, locker locking solution.

Program Elements

- ✓ **Annual Compatibility Review**
Verification testing and design review by engineers ensuring compatibility between locks and lockers.
- ✓ **Periodic Production Spot Checks**
WEC Mfg. performs periodic operation compatibility testing of locks on actual locker orders.
- ✓ **New Product Validation**
Ensures that new lock and locker products work as intended before introduction, providing seamless locker locking.
- ✓ **Annual Design Conference**
Master Lock and WEC Mfg. engineers meet to support, collaborate, and assist in continuous improvements.

Locker manufacturers participating in this program have agreed to conduct lock-locker testing and work in collaboration with Master Lock. This does not guarantee specific security or durability standards. Locker purchasers should conduct their own evaluation of lock-locker solutions prior to purchase to ensure the selected lock-locker solution meets their needs.

Please use this table as a guide only. Master Lock recommends trying your selected lock on your specific application prior to any purchase. Contact your lock distributor or Master Lock for assistance.

1690/1790 locks are recommended for single point latch lockers.

*Note: Single point latch lockers transitioned from horizontal latching (1652 or 1670) to rotating latching (Wrap Around Latch™) in 2008. Lockers built before 2008 will use horizontal latch locks. Please check with the locker manufacturer to confirm latch type used for lock built in 2008 or after.

Locker Selection	Lock Selection Handle/Latch Type	Lock Selection		Built-In Combination Locks				Built-In Keyed Locks		Combination Portable Padlocks		
		Electronic Built-In Locks	Multi-User Locks	General Security		Higher Security	General Security	Higher Security	Key Controlled		Not Key Controlled
